

Project Demo Planning

Date	02 July 2026
Team ID	
Project Name	Rising Waters
Maximum Marks	1 Mark

Project Demo Planning:

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction and Problem Statement	Introduce the flood problem and the need for an early warning system.	2	Keerthana Mirapala
2	Dataset and Data Analysis	Explain the dataset, features, and exploratory data analysis.	2	Keerthana Mirapala
3	Model Development	Present preprocessing, machine learning models, and evaluation results.	3	Keerthana Mirapala
4	System Architecture	Explain the technical architecture and workflow of the application.	2	Keerthana Mirapala
5	Live Demonstration	Demonstrate the web application and flood prediction results.	3	Keerthana Mirapala
6	Conclusion and Future Scope	Summarize the project and discuss future enhancements.	1	Keerthana Mirapala

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the importance of flood prediction and project objectives.
2	Solution Overview	Describe the dataset, machine learning models, and system architecture.
3	Live Feature Demonstration	Demonstrate the prediction input page and result pages.
4	Q&A Session	Answer questions related to implementation and model performance.
